## ABOUT US

---

**N**amo Fibres Pvt. Ltd., headquartered in Delhi, continues to be one of the prominent manufacturers of polyester monofilament in India since 2009.

Today the Company has made tremendous progress and is well established as a specialized quality manufacturer of monofilament yarn to meet the demands of flourishing zipper industry.

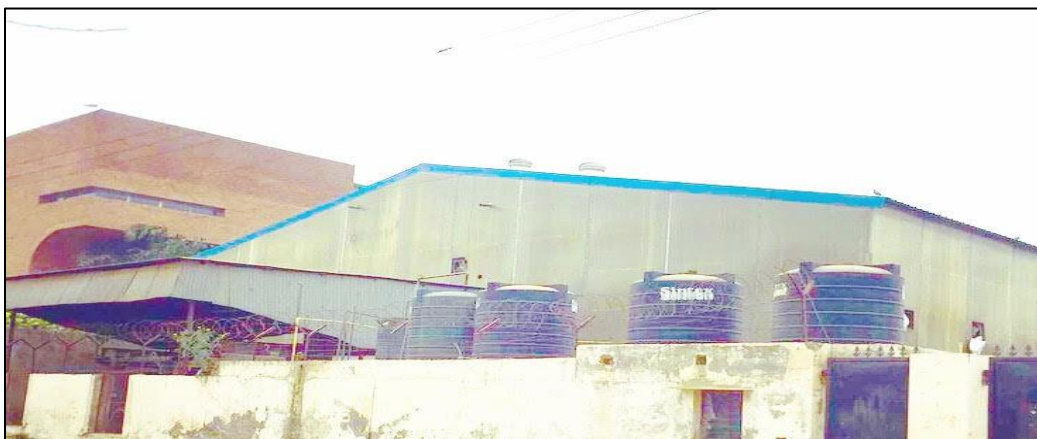

Keeping pace with technological developments in the field of yarn manufacturing, Namo Fibres went in for the modification and modernization of its key machineries in 2016. This helped the company to achieve a high level of productivity also assuring a high standard of quality to meet the customer requirements.

Our facility at Gurgaon, Haryana boasts of having an installed capacity of 4000 tons per annum dedicated only for zipper industry. Our product quality has earned us the reputation of the most preferred supplier of monofilament.

## OUR VISION

---

To be No. 1 in the category as the expert of the category

## ■ Our Philosophy

In the rapidly changing world, we believe that business partners have to move in tandem. We aim to cultivate and nurture a long term relationship with our customers, based on commitment and trust.

Our Philosophy remains to provide **“TOTAL SATISFACTION”** to our family of customers, through products of highest quality, at competitive prices.

With increasing focus on “Value Addition”, we are committed to creating products for our customers, to bring them in a comfortable position to make **“PROFIT from US”**.

## ■ Quality

Our well established Quality check laboratory which runs round-the-clock makes sure of not deviating from the quality standards which have been laid down by the company.

Our prime motive is to manufacture quality product and align it with the customer’s specifications.

Following machinery capabilities help us strive our vision:

- Boiling Shrinkage Machine
- Dial gauge
- Heat Shrinkage Testing Machine
- Tensile Testing Machine

## ■ Products

Namo Fibres produces monofilament yarn in varied sizes ranging from 0.3mm to 1.05mm suitable for every application in zips and woven fabric production.

**Colours** → Black, Golden, White

**Customization** → Our facility is capable of making customized sizes of yarn as per requisite specifications by the customer

**Raw Material** → Each yarn is made to the highest quality of standards with the great attention to detail. In order to ensure that the product meets the desired quality standard, we source the best polyester chips (Reliance/Garden).

## ■ Innovation

- We have to our credit of being the pioneers in India in manufacturing white colour monofilament from recycled waste. It was appreciated industry wide as it had reduced the cost of raw white zipper roles across.
- We have recently innovated ourselves to enable production of monofilaments in red, grey and orange colours
- We are hopeful to make metallic finish monofilament yarn for special applications.

## ■ Service

---

We are noted across the markets for delivering the right product at the right time. Our efforts have resulted in adoption of **Just-In-Time Inventory** management system by our customers.

We would be happy to serve you by not only being a supplier to your company but be like a business partner and together achieve the final goals of your company.

## ■ Team

---

We are one team with a shared sense of purpose working towards a common goal. Our team consists of well experienced engineers and MBA's from premier institutes like SRCC, Delhi University, Fore School of Management, Delhi College of Engineering and Manchester University.
